I. NOTE ON THE DATA

1. By its decision 81/34 of 27 June 1981, the Governing Council requested the Administrator to continue to provide data on the magnitude and composition of technical cooperation activities (not total activities) funded by organizations of the United Nations system other than the United Nations Development Programme (UNDP). The present report fulfils this responsibility for 1995. Besides data on agency regular and extrabudgetary expenditures/contributions, the report also contains, for completeness, data on UNDP, the United Nations Children's Fund (UNICEF), the World Food Programme (WFP), the World Bank (International Bank for Reconstruction and Development) and the International Development Association (IDA). Only technical cooperation expenditure for the latter two agencies are reported in the present document.

2. It is necessary to point out that the present report does not contain a review of total data on expenditures (and contributions) are not grand totals expenditure (technical and non-technical) by the entire United Nations system, since it excludes expenditures on activities relating to refugees, humanitarian and special economic assistance, peace-keeping operations and disaster relief. Because of the limitation, the phrase "United Nations system" should be interpreted to mean the executing agencies, the International Atomic Energy Agency (IAEA), UNDP, the United Nations Population Fund (UNFPA), UNICEF, WFP and the World Bank. A complete account of expenditure (and contributions) by the United Nations system can be found in the annual report of the Secretary-General on development activities. The present report does, however, contain data on total technical cooperation expenditure of the entire United Nations system.

3. The present report is based on data supplied by participating and executing agencies, including the World Bank/IDA. The raw data for 1995 have been checked for consistency and accuracy, classified, aggregated and are presented in tables 1 to 11 of the statistical annex at the end of the report. The tables are arranged in a specific order: tables 1 through 7 are concerned with technical cooperation expenditures; tables 8, 9 and 10 record contributions; and table 11 summarizes total expenditures for that portion of the United Nations system covered by the report.

4. In more detail, table 1 is intended as a summary of grant technical cooperation expenditures by agencies, including UNFPA, and UNDP (central resources and administered funds), while table 2 shows the same data but distributed by sectors. Table 3, an extremely aggregative table, brings together total non-UNDP-financed technical cooperation expenditures: regular budget expenditures plus agency extrabudgetary expenditures plus expenditures by UNFPA. Several features of this table are worth observing: (a) expenditures are classified according to sectors; (b) for each agency, expenditures are distributed according to type of expenditure - regular budget (A), United Nations system extrabudgetary sources other than UNDP (B1), non-United Nations system multilateral sources (B2), bilateral sources channelled through the United Nations system (C1), and unilateral "self-supporting" sources (C2); and (c) expenditures by UNFPA, all classified as B1 expenditures, are distributed according to executing agency. This means that the reported B1 expenditures of agencies are augmented by the amount of UNFPA expenditures for which they have

been responsible (as reported by UNFPA). As a result, UNFPA itself is responsible for only a fraction of its own expenditure. For example, in 1995, UNFPA reported total expenditures of $231 million but was directly responsible for the implementation of $108.6 million; the rest of the expenditures funded projects that were implemented by other agencies.

5. Tables 4 through 7 amplify on the "sources" of table 3. More specifically, table 4 breaks down regular budget expenditures (A) by country and agency. Obviously, the grand total of this table is the same as that shown in the total column of line A at the end of table 3. Table 5 contains the distribution of expenditures stemming from United Nations system other than UNDP (B1) by country and agencies. The total in this table also agrees with that shown in the total column of line B1 at the end of table 3. Table 6 is concerned with expenditures funded from non-United Nations system multilateral sources (B2), also classified by country and agency. Again, the total of this table equals that shown in the total column of line B2 at the end of table 3. The country-agency breakdown of bilateral resources channelled through the United Nations system (C1) is given in table 7; the total of this table is the same as that in the total column, line C1, at the end of table 3. Finally, the country-agency distribution of unilateral expenditure (C2) is shown in the final column of table 10. Again, the total of this table agrees with that in line C2 of table 3.

6. Table 8 relates to contributions received for the funding of the extrabudgetary expenditures of agencies, organized under the following headings: unilateral and bilateral sources (country or territory and non-governmental organizations) and multilateral sources (United Nations system and non-United Nations system). Contributions received by agencies to fund "self-supporting" technical cooperation expenditures are presented in table 9. Contributions made to WFP are also shown (table 10). These, it should be noted, are essentially in-kind, food-aid contributions, appropriately valued. Finally, table 11 consolidates expenditures by agencies, including UNDP (central and administered funds), UNFPA, UNICEF, WFP and the World Bank/IDA so as to present a quick view of "total" expenditures flowing through the United Nations system during 1995. "Total" is in quotes to indicate it is expenditure of only that part of United Nations system covered by the report.

7. In the use and interpretation of the data in this document, the following points should be noted:

(a) The first point is related to the budget period of agencies. All agencies operate on an annual budget except the World Health Organization (WHO) and UNICEF, which have a biennial budgeting horizon. This, however, is not a problem with UNICEF, which continues to submit expenditures on an annual basis. On the other hand, WHO, with its current biennium running from 1996-1997, reports estimated expenditure for the first year of the biennium while the data for the following year include expenditure incurred in that year plus adjustments to expenditures in the previous year. In practice, it turns out that figures for the second year of the biennium are much higher than those for the first. To avoid huge jumps in WHO expenditure from year to year, the approach adopted is to apportion total expenditure equally over both years of the biennium. This approach does not require an update to the detailed

breakdowns of expenditure in the first year of the biennium - they are the same as those in the statistical annex to the present report;

(b) Second, all expenditure data for the executing agencies, including IAEA and the World Bank/IDA, refer to technical cooperation expenditure net of administrative and support costs and not total expenditure (technical plus non-technical plus administrative and support costs, and other costs). The only exception is WHO, since its technical cooperation expenditure is inclusive of support, but not administrative, costs. Data on contributions refer to actual contributions made by the contributing party. Thus, contributions are not the same as income, since the latter includes, in addition, items such as interest, miscellaneous income, currency adjustment and the like;

(c) The third point is that for the fifth straight year the Economic Commission for Africa (ECA) has advised that its unilateral "self-supporting" contributions constitute, in effect, a pooled fund, representing the United Nations Trust Fund for African Development (UNTFAD). In view of the pool-accounting nature of the resources, it is difficult to identify contributions of any specific country intended to fund projects only in that particular country. In this case, then, the term "self-supporting" contributions/expenditure deviates from its normal meaning;

(d) Finally, data reported by the United Nations Educational, Scientific and Cultural Organization (UNESCO) under its regular budget expenditure represent expenditure incurred under that organization's participation programme, a practice which began in 1982.

II. UNITED NATIONS SYSTEM EXPENDITURE

A. Non-UNDP-financed technical cooperation: aggregate profile

8. The discussion, covering the period 1993-1995, begins with the technical cooperation expenditures (NFTCE) of the specialized agencies, including UNFPA, and then moves on to those of UNDP, UNICEF, WFP and the World Bank group. This strategy allows for, among other things, an insight into the expenditure patterns of the entities concerned. This partial picture is then consolidated to obtain the larger view of the United Nations system (as defined in this document). Throughout the document, the discussion, as in the previous year, takes the form of presenting the salient points based on data given in tables.

9. The variable NFTCE is intended to capture technical cooperation expenditure financed by the United Nations system other than UNDP. Put another way, it is technical cooperation expenditures financed by the specialized agencies of the United Nations system, including UNFPA. Based on table 1, the following observations are in order:

(a) After a marginal contraction in 1993, NFTCE expanded briskly (11.9 per cent) in 1994. The expansion continued in 1995, but at a much reduced pace (3.6 per cent) - a pace slightly above the United States rate of inflation. While a large fraction of the expansion in both years is attributable to WHO, there are other agencies that contributed significantly to growth in 1995,

Table 1. Nominal NFTCE: A three-year view, 1993-1995

	1993	1994	1995
NFTCE ($M)	1 288.4	1 442.2	1 494.3
Change (%)	-0.46	11.9	3.6
Agency share (percentage)			
Share of WHO	42.9	45.4	43.9
Share of FAO	16.4	13.2	13.4
All other agencies	40.7	41.1	42.7
Sectoral share (percentage)			
Health	42.9	45.4	44.1
Agriculture	17.0	12.5	14.2
Population	10.7	14.2	15.6
General development	2.1	2.0	1.9
Other social sectors a/	10.0	9.1	8.6
Environment	1.2	1.1	0.9
All others	16.1	15.7	14.7
NFTCE as a share of (percentage)			
United Nations system technical cooperation assistance	33.2	34.6	38.1
United Nations system total (technical and non-technical) assistance	21.1	22.7	25.7
Total UNDP	6.9	115.7	118.8

Abbreviation: $M = millions of United States dollars.

a/ Includes human settlements, education, employment, social development and culture.

including the United Nations, the United Nations Centre for Human Settlements (UNCHS), UNFPA, the United Nations Industrial Development Organization (UNIDO), the Food and Agriculture Organization of the United Nations (FAO), IAEA, the International Labour Organization (ILO) and the World Intellectual Property Organization (WIPO);

(b) As is usually the case, NFTCE was dominated by WHO and FAO, which together accounted for 58 per cent of such expenditures during the last three years, which is very close to their historical average (57 per cent);

(c) The share of NFTCE invested in health-related issues during the 1993-1995 period ranged between 42.9 and 45.4 per cent. The three largest sectors continue to be health, agriculture and population, accounting for approximately 72 per cent of the expenditure during the three-year period. There is some indication from the data of the growing importance of the health and population sectors. The agricultural sector, on the other hand, has been contracting. The same was also true for the social sectors and the environment, both of which recorded a sustained decline during the three-year period.

Sources of non-UNDP-financed technical cooperation

10. NFTCE is made up of the sum of expenditures from three sources: extrabudgetary expenditure (EBE), regular budgetary expenditure (RBE) and UNFPA, data on which are presented in table 2 below, along with relevant observations on expenditures from each of these sources.

Table 2. NFTCE: expenditure components, 1993-1995

	EBE		RBE		UNFPA	
Year	$M	% change	$M	% change	$M	% change
1993	808.4	-3.1	345.8	4.2	134.2	4.7
1994	812.0	0.5	428.8	24.0	201.4	50.1
1995	830.0	2.2	433.4	1.1	231.0	14.7

Extrabudgetary expenditures

11. Two general features characterize agency extrabudgetary expenditures: (a) they comprised the largest segment of NFTCE, with a historical average of approximately 56 per cent; and (b) they show a long-term tendency towards comprising an even larger share of NFTCE, i.e., on average, the share of EBE keeps growing, although the rate of growth has slowed down during the last few years.

12. Additional observations include:

(a) EBE, which remained basically at the same level during the period 1993-1994, recorded slight growth in 1995. But even at $830 million, EBE was only $22 million more than what it was two years ago. Indeed, the data show that the growth of EBE has been much depressed since 1991, unable to duplicate the relatively high rates of growth that were a feature in prior years;

(b) There is both equity and dominance in the distribution of EBE. As in the past, all agencies have EBE; during 1995, FAO and WHO dominated EBE, accounting for 44 per cent and 13 per cent of EBE, respectively (see table 1);

(c) As might be expected from the above, the sectoral allocation of EBE more or less followed agency shares. Throughout the three-year period, investment in the health sector consumed some 45 per cent of EBE, perhaps reflecting some of the issues raised in the WHO publication The World Health Report 1996, which argues for increasing investment in this sector. The share of agriculture, which fell sharply in 1993, recovered somewhat in 1995 (14 per cent of EBE), while investment in the population sector continues its upward march, standing at 16 per cent of EBE. These three sectors - health, agriculture and population - accounted for some three quarters of EBE in 1995. To accommodate this growth, expenditures in other sectors had to contract: indeed, expenditures in areas of development other than the social sector and the environment witnessed a sustained contraction during the three-year period.

13. Extrabudgetary expenditures are based on voluntary contributions from multilateral (both inside and outside of the United Nations system) and bilateral sources (outside of the United Nations system). With regard to multilateral sources, the following observations may be made, based on table 3 below:

(a) Expenditure rose to $86.7 million, up from $68.9 million in 1994, thus continuing a rapid rate of growth (25.8 per cent);

(b) Multilateral sources were responsible for almost 11 per cent of EBE during 1995, compared to 7 per cent in 1993. In fact, this was the first time in many years that the share of multilateral sources in EBE was in two figures, perhaps signalling a rising importance of these sources to the work of agencies;

(c) Close to 56 per cent of all multilateral expenditures originated from the United Nations system itself (these expenditures (B1) represent the movement of resources from one agency to another); such United Nations system expenditures amounted to $48.3 million, compared to $26.1 million in 1993 and $42.8 million in 1994. The steady growth of "internal" financing may be taken as an indication of growing cooperation, including coordination, among agencies of the United Nations system, an observation that gains plausibility given the dwindling share of "external" multilateral expenditure;

(d) The remaining multilateral expenditures ($38.4 million) were from sources outside the United Nations system (B2); the level of expenditure was 11.5 per cent less than in 1994. The data over the last few years clearly point to the diminishing relative importance of "external" multilateral expenditure to the work of agencies.

14. The bilateral component is the larger of the two components of EBE (and thus NFTCE), accounting for 90 per cent of expenditures, which is slightly above its historical average. In other words, the bulk of the extrabudgetary expenditures by agencies is based on voluntary contributions from bilateral donors. Additional observations include:

(a) During the last three years, expenditures originating from bilateral sources basically stagnated at under $750 million per year. In fact, since 1991, the growth performance of bilateral expenditures has been rather poor compared to earlier years;

Table 3. Components of extrabudgetary expenditures, 1993-1994

Year	Total EBE	Multilateral (B1+B2-UNFPA)		Bilateral (C1+C2)	
		$M	% change	$M	% change
1993	808.4	55.3	-6.7	753.1	-2.7
1994	812.0	68.9	24.6	743.1	-1.3
1995	830.0	86.7	25.8	743.3	0.0

Note: See the end of table 3 in the statistical annex for definitions of B1, B2, C1 and C2 expenditures.

(b) Bilateral expenditures come from two sources: (i) bilateral donor countries (C1 sources) and (ii) recipient countries themselves ("self-supporting" or C2 sources). Always responsible for the larger share of expenditures, bilateral donors were responsible for 90 per cent of total bilateral expenditures during the last three years, which is their historical average (85 per cent). In other words, growth or no growth, bilateral expenditure is derived from the voluntary contributions of donor countries. "Self-supporting" expenditures - used to finance technical cooperation activities within and only within the country incurring the expenditure - were $84 million in 1995, or 8 per cent more than in the previous year.

Regular budget expenditures

15. Regular budget expenditures, defined as expenditures financed out of the assessed contributions of agencies, continue to be an important source of funding for the technical cooperation activities of agencies. While its relative share in NFTCE has been declining over time, RBE has historically accounted for approximately 30 per cent of NFTCE, although the data indicate a declining share since 1988. Standing at 27 per cent in 1993, the share of RBE recovered substantially in the following two years, averaging more than 29 per cent per year. This growth, implicit from the above discussion, resulted from the stagnation of EBE.

16. It is also interesting to look at RBE from the point of view of agency expenditures only (i.e., NFTCE less expenditures by UNFPA). Between 1988 and 1993, RBE made up about 30 per cent of agency technical cooperation expenditures, some 10 per cent less than in the past eight years. In the period 1994-1995, RBE showed some signs of recovery, reaching an average of 34.5 per cent. It is not known whether this recovery can be sustained since it owes its buoyancy to stagnating EBE.

17. Other relevant observations include:

(a) After rapid increase over 1993 (24 per cent), RBE stagnated for the rest of the period 1994-1995. Indeed, many agencies recorded a contraction.

The biggest stimulus - which caused the growth in 1994 and the maintenance of the level of RBE in 1995 - came from WHO, UNIDO, FAO, IAEA, ILO, the Universal Postal Union (UPU) and WIPO (see table 1 above and table 1 of the statistical annex);

(b) Even more than with EBE, aggregate expenditures from the regular budget of agencies were overwhelmingly (70 per cent) invested in the health sector during the period 1994-1995, compared to 60 per cent in 1993. To accommodate growth of this magnitude, expenditures in other sectors contracted. The relative contractions were particularly severe in natural resources, human settlements, agriculture, communications and information, the social sectors and environment.

United Nations Population Fund

18. The main focus areas of UNFPA work, and thus its technical cooperation expenditures, are to help to ensure universal access to reproductive health services, including family planning and sexual health; to support population and development strategies that enable capacity-building in population programming; to promote awareness of population and development issues; and to advocate for the mobilization of the resources and political will necessary to accomplish the above. The following observations may be made:

(a) Of the three sources contributing to NFTCE, UNFPA is the smallest, accounting on average for approximately 14 per cent of NFTCE since 1980. After peaking at 17.2 per cent in 1993, the UNFPA share was closer to its historical average of 14 per cent in the following year. The 15.5 per cent share reached in 1995 resulted from the stagnation of agency expenditures and the rapid growth of UNFPA expenditures;

(b) Expenditures on field programme activities reached $231 million in 1995, some $30 million or 14.7 per cent more than in the previous year. The sudden jump in expenditures to over $200 million during the last two years underscores the importance of population issues in the fight against poverty;

(c) Africa and Asia and the Pacific absorbed the major share (over 60 per cent) of UNFPA expenditures (see table 4 below). The data indicate that the share of expenditure to Africa has been rising (from 27.1 per cent in 1993 to 31.7 per cent in 1995), while that for Asia and the Pacific has been falling (from 36.7 per cent in 1993 to 31.1 per cent in 1995). The Arab States and Europe received the smallest portion of UNFPA expenditures. On average, approximately 13 per cent of expenditures financed activities at the interregional and global level; there is, however, some indication that this share is contracting;

(d) During the last three years, India has been the largest recipient of aid from UNFPA ($11.7 million in 1995, $11.9 million in 1994 and $7 million in 1993). On a smaller scale, 29 countries received more than $2 million each of assistance from UNFPA during 1995, compared to 23 in 1994 and 13 in 1993;

(e) As in the past, all expenditures by UNFPA are classified under the population sector.

Table 4. Geographical distribution of UNFPA expenditure, 1993-1995

(In millions of dollars)

Region	1993	1994	1995
Africa	36.4	57.4	73.2
Asia and the Pacific	49.2	70.5	71.8
Latin America and the Caribbean	15.4	28.5	32.2
Arab States and Europe	13.4	18.8	26.4
Interregional and global	19.8	26.2	27.4
Total	134.2	201.4	231.0

B. United Nations Development Programme

19. The mission of UNDP is to help countries in their efforts to achieve sustainable human development by assisting them to build their capacity to design and carry out development programmes in poverty eradication, employment creation and sustainable livelihoods, the empowerment of women, the protection and regeneration of the environment and governance, giving first priority to the thematic area of poverty eradication and the functional area of national capacity-building. In the pursuit of this mission, UNDP, the world's largest multilateral grant-providing organization, has invested over $1 billion annually in developing countries since 1990. On the basis of table 5 below, the following observations about the expenditures of UNDP may be made:

(a) Total expenditure in 1995 was basically constant - at $1,257.4 million, it was only 1 per cent over the level of expenditure of 1994, representing the smallest increase since 1993;

(b) In both 1994 and 1995, 21 programme countries received more than $10 million of actual assistance from UNDP (there were 27 such countries in 1993). In both years, Brazil was the largest recipient, with $81.0 million and $94.7 million in 1994 and 1995, respectively, almost all of which came from cost-sharing contributions in both years. In general, cost-sharing is a characteristic feature of the Latin America and Caribbean region comprising a significant portion of expenditure. Other major recipient countries during 1994 and 1995 were Afghanistan, Argentina, Bangladesh, Bolivia, Cambodia, China, Colombia, Ecuador, Haiti, Honduras, India, Indonesia, Kenya, Mozambique, Myanmar, Nicaragua, Pakistan, Panama, Peru, Rwanda, Somalia, Uganda, the United Republic of Tanzania and Uruguay (for a more detailed list, see table 11 in the statistical annex);

(c) Total UNDP expenditures is made up of expenditures from (i) central resources, which comprises voluntary and cost-sharing contributions, and (ii) funds and trust funds administered by UNDP. Expenditures from central

Table 5. Expenditures by UNDP: central resources and administered funds and trust funds, 1993-1995

	1993		1994		1995	
	Amount ($M)	Change (%)	Amount ($M)	Change (%)	Amount ($M)	Change (%)
Total UNDP	1 204.4	3.4	1 246.3	3.5	1 257.4	0.9
Central resources	1 031.0	0.4	1 036.5	0.5	1 014.2	-2.2
Administered funds	173.4	25.4	209.8	21.0	243.2	15.9

resources contracted by 2.2 per cent in 1995, ending two years of marginal growth. However, expenditures from funds and trust funds administered by UNDP expanded briskly (15.9 per cent), continuing on a path that began in 1991;

(d) As a consequence, it can be said that the slight growth of total UNDP expenditures in 1995 is the result of the rapid growth of expenditures by funds and trust funds.

20. Geographically, programme expenditures by UNDP were distributed as shown in table 6 below. One of the important features of UNDP expenditure is the rapid

Table 6. Geographic distribution of UNDP programme expenditures

growth of cost-sharing by the Latin American and Caribbean region, which explains the sudden relative shift of expenditure to the Africa region. Data on the geographical distribution of government cash counterpart contributions (GCCC) are not available.

C. United Nations Children's Fund

21. In partnership with national Governments, UNICEF implements programmes for children and women in 161 countries, providing community-based services in primary health care, nutrition, basic education and safe water and sanitation. In industrialized countries, the work of UNICEF is supported by its national committees, which undertake advocacy, public education and fund-raising activities. Some additional observations are:

(a) During the last three years, programme expenditures, which are classified as non-technical cooperation expenditures for the purposes of the present report, have remained constant, at slightly over $800 million per year. In 1995, such expenditures recorded a small increase over the previous year (0.3 per cent, see table 7 below). Geographically, field programme expenditures in 1995 were distributed as follows:

Area/region	Amount ($M)
Africa	278.2
Americas and the Caribbean	77.7
East Asia and the Pacific	90.8
South Central Asia	111.6
Middle East and North Africa	86.4
Europe	73.5
Global assistance	85.3

(b) During 1995, 20 countries had UNICEF programmes valued at more than $10 million. India was the largest recipient, with $68.1 million. Other major recipients in 1994 and 1995 were Angola, Bangladesh, Brazil, China, Ethiopia, the Islamic Republic of Iran, Mozambique, Rwanda, Somalia, Sudan, Viet Nam and the former Yugoslavia;

(c) Total contributions to UNICEF increased by 1.3 per cent in 1995 over the 1994 level. This was primarily the result of an increase of 10.8 per cent from private sector sources. Contributions from Governments in 1995 declined marginally (0.4 per cent) from the previous year;

Table 7. Contributions and expenditures by UNICEF, 1993-1995

	Expenditure		Contributions	
Year	$M	% change	$M	% change
1993	803.7	8.1	843.1	-10.1
1994	800.6	-0.4	956.3	11.8
1995	803.4	0.3	968.7	1.3

Note: The term "contribution" refers to a narrower concept than income as contributions exclude proceeds from interest, currency adjustment and miscellaneous items.

(d) Virtually all Governments of both industrialized and developing countries contributed to UNICEF during the biennium 1994-1995. The relative share of each contributing source is given below:

	Percentage	
Source	1994	1995
Governments	68.8	67.6
Non-government sources	17.3	18.1
Inter-organizational arrangements	2.1	0.6
Greeting Card and related Operations	11.9	13.6

While some two thirds of the contributions come from Governments, it is evident that a relatively sizeable share of contributions is derived from private fund-raising efforts and non-government sources;

(e) The entire field programme expenditure by UNICEF was invested in the welfare of the developing world's children.

D. World Food Programme

22. For the purposes of the present report, assistance by WFP is classified as non-technical assistance, being primarily in the nature of food and commodity aid. The mission of WFP is to provide: (a) food for life to sustain victims of man-made and natural disasters; (b) food for growth to improve the nutrition and quality of life of the most vulnerable people at critical times in their lives; and (c) food for work to help build assets and promote the self-reliance of poor people and communities through labour-intensive work programmes. Based on table 8 below, the following observations may be made:

Table 8. WFP: contributions and expenditure, 1993-1995

Year	Expenditure		Contribution	
	$M	% change	$M	% change
1993	1 487.7	-5.5	1 421.1	-17.5
1994	1 394.1	-6.3	1 515.9	-6.7
1995	1 097.8	-21.2	1 285.4	-15.2

(a) Total field programme expenditures by WFP, while still over $1 billion, has been contracting since 1993; the decline was particularly sharp in 1995 (21.2 per cent), more than three times as steep as the decline in the two preceding years. Some 104 countries or areas received assistance from WFP in 1995, compared to 98 in the previous year. Owing to the increase in the number of countries/areas receiving assistance, expenditure per country/area has decreased from $15.7 million in 1993 to $10.6 million in 1995. It may be noted, however, that the growth of WFP expenditure is heavily dependent upon the emergence of severe "food crisis" situations; total assistance and thus per country assistance must be viewed and interpreted in this context;

(b) The countries which received more than $40 million each in assistance were: Rwanda ($150.7 million); the former Yugoslavia ($92.8 million); Liberia ($63.8 million); Ethiopia ($63.6 million); Angola ($42.4 million); and Bangladesh ($40.7 million). As is evident, only four countries received more than $50 million in assistance during 1995, compared to 10 and 7 in 1993 and 1994, respectively. Ten other countries received between $20 and $30 million in assistance during 1995: Afghanistan, Cambodia, China, India, Iraq, Malawi, Somalia, Uganda, the United Republic of Tanzania and Zaire;

(c) As might be expected, the bulk of the assistance provided by WFP ($743.6 million or 67.7 per cent) was used (through direct assistance, work-for-food programmes, etc.) for humanitarian assistance and disaster management. Other sectors which received relatively large amounts of assistance were: education ($118.7 million or 10.2 per cent); agriculture, forestry and fisheries ($67.0 million or 6.1 per cent); and health ($61.1 million or 5.6 per cent). Clearly, WFP assistance is also intended to lend support to the development thrust of recipient countries, in addition to providing emergency relief;

(d) As with expenditures, contributions to WFP slipped sharply (by 15.2 per cent) reaching $1,285.4 million in 1995, compared to $1,515.9 million in 1994. Major contributors include the United States of America ($447.9 million); the European Economic Committee ($118.0 million); Germany ($98.2 million); the Netherlands ($93.2 million); Canada ($92.5 million); Japan ($88.8 million); Denmark ($51.8 million); the United Kingdom of Great Britain and Northern Ireland ($50.8 million); Australia ($46.0 million); Sweden ($38.6 million); and Norway ($34.4 million). As in 1994, these 11 donors accounted for some 92 per cent of all contributions to WFP in 1995.

E. World Bank group

23. Technical assistance is a major ingredient in the many instruments which the World Bank group (the World Bank and the International Development Association) utilizes to support the transfer of technology and to build capacity among its borrowing member countries. Most technical assistance is connected with its lending operations, although a significant volume is provided through other financial instruments, mainly grants.

24. Most of the technical cooperation assistance by the World Bank group is not in the form of outright grants, as is the case with the rest of United Nations agencies covered in the present report, but is provided as loans and credits, with the latter being interest-free for a forty-year period. For this reason, such assistance by the World Bank group is referred to in the present report as "concessional" technical cooperation assistance.

25. The five-year growth of actual technical cooperation expenditures disbursed (not committed) by the World Bank group came to an end in 1995, as expenditures dropped by 20.6 per cent over the previous year. As a consequence, the level of expenditure in 1995, $1,173.6 million, was only marginally greater than in 1992. It may also be observed that the shortfall resulted from a contraction of the technical cooperation expenditures of both the World Bank and the IDA, a phenomenon not seen since 1984. Other observations, based on table 9 below, are:

(a) Technical cooperation expenditure by the World Bank has been decreasing over the last three years, moving from $943.1 million in 1993, to $708.0 million by September 1995, with a 21.6 per cent decrease in expenditure in 1995. The major recipients of World Bank technical cooperation assistance are: Argentina, Brazil, Indonesia, Mexico and Turkey;

(b) Technical cooperation expenditure by IDA fell by 14.5 per cent during 1995, reversing the positive growth during the previous two years. The main recipients of IDA technical cooperation assistance are: Angola, Bangladesh, Bolivia, China, Guinea, India, Kenya, Mozambique, Pakistan and the United Republic of Tanzania.

Table 9. Technical cooperation expenditure by the World Bank group, 1993-1995

Year	World Bank		IDA		Total World Bank group	
	$M	% change	$M	% change	$M	% change
1993	943.1	25.6	468.2	14.3	1 411.4	22.4
1994	902.7	-3.4	544.4	16.3	1 477.1	4.7
1995	708.0	-21.6	465.6	-14.5	1 173.6	-20.6

Note: Figures for 1993 and 1994 have been updated, as per data submitted by the World Bank (8 February 1996). Data for 1995 are estimates and cover the period January-September 1995.

F. The United Nations system: total assistance delivered

26. For the purposes of the present report, assistance from the United Nations system (see para. 2 for definition) is classified as: (a) grant technical cooperation; (b) total technical cooperation (concessional technical cooperation from the World Bank/IDA plus grant technical cooperation); (c) grant total assistance (non-technical cooperation expenditures of WFP and UNICEF plus grant technical cooperation); and (d) total assistance (non-technical cooperation expenditures of WFP and UNICEF plus total technical cooperation). With this in mind, the following observations, based on table 10 below, may be made:

(a) Grant technical cooperation grew throughout the 1993-1994 period at an average rate of just under 4 per cent annually. Most of this growth resulted from a large increase in 1994. Such expenditures totalled $2,751.7 million in 1995, or 2.4 per cent more than the previous year;

(b) When the concessional assistance of the World Bank/IDA is taken into account, total technical cooperation amounted to $3,925.3 million, almost 6 per cent less than in 1994 and reversing a positive rate of growth since 1989;

(c) Total grant assistance from the United Nations system has performed fairly weakly since 1993, culminating in a contraction of almost 5 per cent in 1995, when such assistance reached $4,652.9 million. Viewed against a longer period of time, 1995 stands out as the only year since 1983 when total grant assistance did not record growth;

(d) Total assistance by the United Nations system (including World Bank/IDA assistance) stood at $5,826.5 million in 1995, a particularly steep decline, reflecting falling rates of growth since 1991. The year 1995 was perhaps the first time ever that total assistance from the United Nations system contracted;

Table 10. Nominal assistance delivered by the United Nations system, 1993-1995

	Technical cooperation assistance (grant and total)				Total assistance (sum of technical and non-technical cooperation assistance)			
	Excl. World Bank/IDA		Incl. World Bank/IDA		Incl. Agencies, UNDP, WFP, UNICEF, World Bank/IDA			
Year	Grant TC (GTC) ($M)	Growth (%)	Total TC (TTC) ($M)	Growth (%)	Grant Tot Ast (GTAS) ($M)	Growth (%)	Total Ast (TTAS) ($M)	Growth (%)
1993	2 492.8	1.3	3 885.7	6.7	4 784.2	0.1	6 122.1	3.7
1994	2 688.5	7.9	4 165.6	7.2	4 883.2	2.1	6 360.3	3.9
1995	2 751.7	2.4	3 925.3	-5.8	4 652.9	-4.7	5 826.5	-8.4

Memo item - Non-technical cooperation expenditure (UNICEF plus WFP)

Year	$M	Growth (%)
1993	2 291.4	-1.2
1994	2 194.7	-4.2
1995	1 901.2	-13.4

Non-technical cooperation expenditure constitutes the difference between technical cooperation assistance and total assistance. It is, in effect, the sum of expenditures by UNICEF and WFP.
Non-technical cooperation as a % of GTAS: 48, 45 and 41 in 1993, 1994 and 1995 respectively;
Non-technical cooperation as a % of TTAS: 38, 35 and 33 in 1993, 1994 and 1995 respectively.

Note: GTC = grant technical cooperation, defined as the sum of assistance delivered by agencies, UNFPA, and UNDP; TTC = total technical cooperation, defined as GTC plus technical cooperation expenditures of the World Bank and IDA; GTAS = grant total assistance, defined as GTC plus expenditures incurred by WFP and UNICEF; TTAS = total assistance of the United Nations system as defined in this report, which is equal to TTC plus expenditures incurred by WFP and UNICEF. All amounts are in nominal dollars and are net of administrative and support costs, aside from the exceptions noted in paragraph 2. It is necessary to point out that GTAS and TTAS are likely to underestimate considerably the true value of total assistance delivered by the entire United Nations system since expenditures by several entities involved with non-technical cooperation activities have been omitted; these activities fall outside the scope of the present report.

(e) Non-technical cooperation expenditure (comprising WFP and UNICEF), after a period of fairly rapid expansion (1987-1992), performed poorly during the last three years. In fact, the contraction that began in 1993 accelerated to over 13 per cent in 1995. It is also significant to note that non-technical cooperation as a share of total assistance has been decreasing. In the case of total grant assistance (i.e., excluding the World Bank/IDA), the share of non-technical cooperation moved from 48 per cent in 1993 to 41 per cent in 1995. In other words, the share of technical cooperation in total grant assistance is increasing.

III. EXTRABUDGETARY CONTRIBUTIONS TO AGENCIES TO FINANCE TECHNICAL COOPERATION ACTIVITIES

27. Extrabudgetary contributions are intended to fund only the extrabudgetary expenditures of the usual United Nations executing agencies. Such contributions are made voluntarily by Member States, unlike contributions to regular budgets, which are based on assessment. Data on contributions for 1994 are contained in tables 8 and 9 of the statistical annex (a guide to the classification and definition of contributions and expenditures is given in the annex). The present report does not review contributions to the regular budgets of agencies or contributions to UNFPA, UNICEF, WFP and UNDP (central resources and administered funds).

28. Year-to-year comparison of extrabudgetary contributions and expenditure is not advisable since (a) there is a lag between the two variables in the sense that expenditure in any particular year is heavily correlated with contributions in the previous year; and (b) the data is highly aggregated. As a consequence, the observed yearly discrepancy between contributions and expenditures cannot be simply attributed to administrative costs.

29. In general, while bilateral contributions from donor countries continue to account for the largest portion of extrabudgetary contributions, there are incipient signs of change, including (a) the growing importance of the internal transfer of resources from other parts of the United Nations system to the agencies; and (b) the rising importance of traditional sources of smaller contributions: non-governmental organizations and the recipient countries themselves.

30. The following observations are based on table 11 below:

(a) Total extrabudgetary contributions to agencies during 1995 was $1,093.5 million. The resulting growth rate of 4.7 per cent over the previous year thus continued the yearly up-down movement of growth rates that began in 1992. While positive growth in 1995 is remarkable against the backdrop of donor austerity, it is the lowest recorded since at least 1982, with the exception of 1989;

(b) As illustrated in table 11 below, the expansion in 1995 resulted from the growth of both components (bilateral and multilateral) of total contributions. However, the larger stimulus came from multilateral sources, contributions from which increased by $43.7 million, or 12 per cent, over 1994. In fact, one noticeable feature of multilateral sources is their relatively high average rates of growth since 1986. Part of the growth in 1995 may also be attributed to the expansion of contributions from bilateral sources; the "expanding" component here was non-governmental organizations, not bilateral donors;

(c) Undoubtedly, the major portion (some one third) of extrabudgetary contributions to agencies continues to come from bilateral sources. While the data indicate diminishing importance, albeit gradual, 1995 established a new record: only 62 per cent of total contributions came from bilateral sources,

Table 11. Extrabudgetary contributions to agencies, 1993-1995

	1993		1994		1995	
	$M	Growth (%)	$M	Growth (%)	$M	Growth (%)
Total extrabudgetary contributions	1 070.5	9.97	1 044.2	-2.46	1 093.5	4.73
Total bilateral, of which	709.7	6.62	668.5	-5.81	674.3	2.10
Countries/territories	601.2	8.48	555.5	-7.61	540.0	-2.79
NGOs	36.3	9.09	40.7	12.12	61.4	51.36
Unilateral self-supporting	72.2	-7.69	72.3	0.14	80.9	11.90
Total multilateral, of which	360.6	17.21	375.6	4.16	419.2	11.64
United Nations system	309.0	15.85	314.6	1.81	387.8	23.30
Non-United Nations sources	51.6	25.85	61.0	18.22	31.4	-48.53

the least share ever. As table 11 shows, this resulted mainly from a shortfall in contributions from countries/territories;

(d) Total bilateral contributions in 1995 was $674.3 million, representing an increase of just under 1 per cent. This increase was made possible by the huge growth from unilateral self-supporting sources and non-governmental organizations, particularly the latter, which continue to show impressive rates of growth. Agencies, in other words, have been successful in attracting funding from non-governmental organizations, which provided 9 per cent of bilateral contributions in 1995. However, contributions from countries/territories have been contracting for two consecutive years;

(e) On average, multilateral sources account for one third of total extrabudgetary contributions, although there is some indication of a marginal increase over the last few years;

(f) Total multilateral contributions amounted to $419.2 million in 1995, compared to $375.6 million in 1994, a 12 per cent rate of growth over the period 1993-1995. By far the major share of multilateral contributions (86 per cent on average, but 93 per cent in 1995) came from the United Nations system itself. Contributions from this source reached $387.8 million in 1995, the highest ever, compared to $314.6 million in the previous year. Contributions from non-United Nations system sources (such as the African Development Bank, the Arab Gulf Fund for United Nations Development Organizations and the European Union) plunged by 48.5 per cent, reaching only $31.4 million, the lowest since 1989.

Annex

A guide to the terminology

1. Technical cooperation assistance comprises activities that aim to promote increasing self-reliance in the developing countries with regard to managerial, technical, administrative and research capabilities required to formulate and implement development plans and policies, including the management and development of appropriate institutions and enterprises. In the present document, technical cooperation activities are those financed from: (a) the central resources of UNDP; (b) UNDP-administered funds; (c) the regular and extrabudgetary expenditures of agencies, including UNFPA; and (d) the technical assistance window of the World Bank/IDA. A further distinction is made between grant technical assistance constituting (a), (b) and (c) and concessional technical assistance constituting (d).

2. Non-technical cooperation assistance, for the purposes of the present report, comprises activities relating to food and commodity aid, and the welfare of children. In other words, non-technical cooperation expenditures are expenditures by WFP and UNICEF. Clearly, the data on non-technical cooperation activities in the present document are incomplete in the sense that they omit activities relating to refugees, peace-keeping operations, humanitarian and special economic assistance, and disaster relief. For a complete picture, see the annual report of the Secretary-General on operational activities for development of the United Nations system.

3. Total assistance is the sum of technical and non-technical and cooperation assistance.

4. Non-UNDP-financed technical cooperation expenditure (NFTCE) is defined as the sum of expenditures incurred against: (a) agency regular budgets, (b) agency extrabudgetary budgets and (c) UNFPA. Expenditures from UNICEF, WFP and the World Bank/IDA and UNDP-administered funds are not included in NFTCE. In table 1 of the statistical tables, for example, NFTCE for the last two years is shown by the column entitled "Total agencies and UNFPA". Note that in table 11 of the of the statistical tables, NFTCE is the sum of the columns entitled "agency regular budget", "agency extrabudgetary", "UNFPA" and "self-supporting expenditures".

5. Regular budget expenditures (RBE) refers to technical cooperation expenditures financed out of the assessed budgets (contributions) of agencies.

6. Extrabudgetary expenditures (EBE) refers to expenditures financed from voluntary contributions, that is, financed from sources other than RBE, UNDP or UNFPA.

7. Total extrabudgetary expenditures (TEBE) is a term covering: (a) agency extrabudgetary budgets and (b) expenditures incurred by UNFPA. In table 1 of the statistical annex, it is the sum of the columns entitled "Funded by extrabudgetary sources other than UNDP, UNFPA and UNDP-administered funds" and "Funded by UNFPA, whereas in table 11 it is the sum of the amounts in the

columns entitled "agency extrabudgetary budgets", "UNFPA" and "self-supporting sources".

8. Multilateral expenditures are subdivided into: (a) United Nations system other than UNDP central resources and administered funds and (b) multilateral sources outside of the United Nations system. The former includes expenditures incurred in developing countries by the agencies of the United Nations system themselves, including Governments and the World Bank. See tables 3, line B1, and 5 of the statistical tables. Multilateral sources outside of the United Nations system include regional development banks, the Commission of the European Communities, the various Arab development funds, etc. Expenditures from these sources are channelled through the agencies of the United Nations system for the financing of technical cooperation activities in developing countries. See tables 3, line B2, and 6 of the statistical tables.

9. Bilateral expenditures are divided into: (a) expenditures channelled through the United Nations system and (b) unilateral self-supporting expenditures. The former comprises expenditures incurred against resources provided directly to the agency by a Member State or a non-governmental organization to fund technical cooperation activities in any member country. It also includes expenditures against "multi-bilateral" contributions (e.g., a contribution by one country for a specific project(s) in another) as well as expenditures by the agency against special purpose funds managed by the agency itself. The term "unilateral" is rather confusing; it is used to emphasize the fact that expenditures are used to finance technical cooperation activities within the country that made the "contribution" to the United Nations system. The expenditure is thus passed from the given country to the United Nations system and back to the same country; the only difference is that it has acquired a dual character: unilateral, since it returns to the contributing country, but because it is routed through the United Nations system it also acquires a bilateral character.

10. Extrabudgetary contributions are contributions to fund the extrabudgetary expenditures of agencies. Such contributions come from two sources:
(a) multilateral contributions - contributions from non-bilateral entities, subdivided into: (i) contributions from the United Nations system - in essence, such contributions represent an internal transfer of resources in the United Nations system from (mainly) funding to executing agencies and
(ii) contributions originating outside of the United Nations system - contributions by multilateral organizations that are not part of the United Nations system. Examples of these organizations are the African Development Bank, the Arab Gulf Fund for United Nations Development Organizations and the European Economic Commission; and (b) bilateral contributions - broken down into: (i) contributions from countries/territories - representing funds donated to the United Nations system to support activities in developing countries;
(ii) unilateral self-supporting contributions - contributions made by a country to finance technical cooperation activities in that country; and
(iii) contributions from non-governmental organizations - contributions from these sources to the United Nations system.

---

a/ This column is the sum of (a) regular budgets (b) extrabudgetary sources other than UNDP, UNFPA and UNDP-administered funds and (c) UNFPA. In keeping wtih the new definition of non-UNDP-financed cooperation expenditure, all expenditures incurred by UNDP (central resources and administered funds) are excluded.

b/ The sum total of this column is equal to B1+B2+C1+C2 in table 3 (or, alternatively, the sums of tables 5 through 7 and the "self-supporting" column of table 11) minus UNFPA. For a summary by agency and sectors of the total in this column, see table 3; for a breakdown by country, see table 11.

c/ Based on expenditures from IPFs, SPR, SMF/LDC, SIS, cost-sharing and trust funds established by the Administrator, where applicable. Also includes UNV ($10.1 million in 1995).

d/ Includes UN/DDSMS and UN/DESIPA.

e/ Includes UNOPS, UNCDF, UNFNRE, UNIFEM, UNSO and others.

f/ This amount represents GCCC, for which no agency breakdown is available.

Note: Unfortunately, expenditure data from ITU were received too late to be included in the report. The RBE and EBE for this agency are $3,101,000 and $3,846,000 respectively.

Table 2. Non-UNDP and UNDP-financed technical cooperation expenditures by sector, 1994 and 1995
(thousands of US dollars)

a/ For the sector represented by these numbers see the left-hand column of table 2

b/ A - Regular budget
B1 - Funded by United Nations system sources other than UNDP but including UNFPA
B2 - Non-United Nations system multilateral sources
C1 - Bilateral resources channelled through the United Nations system
C2 - Unilaterally financed "self-supporting" expenditures

c/ Includes DDSMS, DESIPA and OPS

d/ The data provided by UNESCO under "Regular budget" represent expenditures incurred under that organization's participation programme. As a rule, UNESCO considers that no technical cooperation activities are financed from its regular budget

e/ Including support costs

Note to table 3

This is an overall summary table of non-UNDP financed technical cooperation expenditures. The right-hand column (labelled "Agency") shows the distribution of non-financed technical cooperation expenditure by budget source (A, B1, B2, C1 and C2) for the given agency. The sectoral amounts (the numbers from 1 through 21 in the header of the table represent sector; see the the left-hand column of table 2 for details on sectors) corresponding to each agency and budget source can be located quickly by plotting the appropriate grid. For example, all expenditures by WMO were in sector 19 (science and technology). Note further that "A" corresponds to "Funded by regular budgets" table 1 and 2, and B1+B2+C1+C2 correspond to "Funded by extrabudgetary sources other than UNDP, UNFPA and UNDP-administered funds" plus UNFPA. For a more detailed breakdown of each budget source, see tables 4 through 7. See notes at the end of these tables for further explanation.

Since B1 includes UNFPA, then agency B1 expenditure from the United Nations system is B1 as in this table minus UNFPA. Total multilateral expenditure is then equal to B2+B1 UNFPA.

The provision of final data by WHO necessitates some adjustments to A, B, B2, C1 and C2 expenditures. The revised figures for these expenditure categories are as follows:

	1994 figures as Reported in DP/1995/56/ Add.1	Revised figures for 1994	Unrevised WHO data for 1994	Revised WHO data for 1994
	$	$	$	$

a/ The data provided by UNESCO under the "Regular Budget" represent expenditures incurred under that organization's participation programme. As a rule, UNESCO considers that no technical cooperation activities are financed from its regular budget.

b/ Data include support costs.

c/ Excluding expenditures by WIPO of $10,473,000 for which no breakdown was provided.

d/ Excluding expenditures by ECE of $1,979,000.

e/ Excluding expenditures by ECLAC of $2,282,000.

f/ Excluding expenditures by UNCTAD of $797,000 and by IMO of $1,844,000.

Note: This table gives a detailed breakdown of total line A (regular budget) expenditures in table 3 in this annex.

Table 5 Extrabudgetary expenditures financed from United Nations system sources other than UNDP, by country or area, 1995 a/

a/ Expenditures do not include overhead paid to executing agencies

b/ This entry comprises agency data for which a detailed breakdown is not available

	$
Afghanistan - Expenditures incurred by UNCHS	290 000
Inter-regional - Expenditures incurred by UNCTAD	85 000
UNFPA - Expenditures incurred by UNRWA	113 000
UNFPA - Expenditures incurred by ECA	198 000
UNFPA - Expenditures incurred by ECE	851 000
UNFPA - Expenditures incurred by ESCWA	60 000
Regional Latin America - Expenditures incurred by IAEA	1 000
Inter-regional and Global - Expenditures incurred by IMO	1 449 000
United Arab Emirates - Expenditures incurred by UPU	62 000
Bhutan - Expenditures incurred by UPU	1 000
Global and Inter-regional - Expenditures incurred by WMO	57 000
TOTAL	3 167 000

Note: This table gives a detailed breakdown of total B1 expenditures in table 3 of this annex. B1 expenditure is defined as expenditure from the United Nations system sources other than UNDP plus expenditure by UNFPA. Thus, to obtain B1 expenditures from agencies, it is necessary to deduct expenditures by UNFPA: $279 291-$230 956 = $48 335. This amount plus B2 plus C1 plus C2 now yields the total amount shown by the column entitled "Funded by extrabudgetary sources other than UNDP, UNFPA and UNDP-administered funds of tables 1 and 2 ($829 981)

a/ Comprising data contained in table 4. Footnotes c through f of this table are included under the appropriate regional commissions and the line entitled 'interregional'. Finally, data from WIPO for which no breakdown by countries was provided have been included under Other Agencies.

b/ Comprising the sum of the total amounts contained in tables 5-7 less the amounts for UNFPA. Note the total amount in this column is not the same as the total amount in the column entitled "Funded by extrabudgetary sources other than UNDP, UNDFPA, and UNDP administered funds" of tables 1 and 2 since it excludes self-supporting expenditures.

c/ Including expenditures against IPF, SPR, SMF/LDC, SIS, cost-sharing and trust funds established by the Administrator, where applicable.

d/ The table showing breakdown by agency may be obtained on request from UNDP.

e/ Includes expenditures against WFP general resources and special trust funds in support of programmes and projects of developing countries. Excludes administrative and other support costs.

Note.

(i) Total grant technical cooperation is defined as the sum of expenditures incurred by the agencies (regular and extrabudgetary, including unilateral and self-supporting expenditures), UNDP (central resources and administered funds), and UNFPA.

(ii) Grant total assistance is the sum of total grant technical cooperation and total non-technical cooperation expenditures (UNICEF plus WFP).

(iii) Grand total is the sum of total assistance delivered by the United Nations system as defined by this report (see note on data, para 6). It is the sum of technical (grant and concessional) and non-technical cooperation expenditures.
